

Ground Covers

(12" or less in height)

Aegopodium p. 'Variegatum', Snow on the Mountain
Ajuga species
Antennaria dioica 'Rubra', Pink Pussytoes
Arabis alpina selections, Rockcress
Arctostaphylos uva-ursi, Massachusetts Kinnikinick
Armeria maritima 'Splendens', Splendens Sea Pink
Artemisia schmidtiana, Silver Mound Wormwood
Aster alpinus, Alpine Aster
Aurinia saxatilis, Basket of Gold
Campanula carpatica, Blue & White Bellflower
Campanula p. 'Blue Waterfall', Blue Waterfall Blue Bells
Cerastium tomentosum, Snow in Summer
Delosperma species
Dianthus species
Erigonum umbellatum, 'Kannah Creek', Buckwheat
Euonymus fortunei coloratus, Purple Wintercreeper
Fragaria species, Strawberry
Galium odoratum, Sweet Woodruff
Geranium cant. 'Biokovo', Biokovo Cranesbill
Geranium mac. and selections, Geranium
Geranium san. and selections, Bloody Cranesbill
Lamium species
Lysimachia species, Moneywort

Mahonia repens, Creeping Mahonia
Nepata 'Junior Walker', Junior Walker Catmint
Nepata x 'Little Trudy', Little Trudy Catmint
Oenothera macrocarpa, Evening Primrose
Phlox subulata, Creeping Phlox
Pulsatilla species
Potentilla neumanniana, Creeping Cinquefoil
Sagina subulata, Irish Moss
Saponaria ocymoides, Soapwort
Sedum acre, Golden Carpet Sedum
Sedum album, 'Coral Carpet'
Sedum kamtschaticum, Yellow Stonecrop
Sedum v. 'Blue Spruce', Blue Creeping Stonecrop
Sedum spurium 'Dragon's Blood', Dragon's Blood Sedum
Sempervivum tectorum, Hen & Chicks
Sisyrinchium montanum
Thymus praecox and *serphyllum*
Veronica liwanensis, Turkish Speedwell
Veronica x 'Tidal Pool', Creeping Speedwell
Vinca minor, Common Periwinkle
Viola, Violet
Zauschneria garrettii 'Orange Carpet', California Fuchsia

Planting on Center	Plants per Sq. Foot	To find how many plants you will need for your project:
4"	9.00	1. Determine the total sq. footage of your planting area (length and width) 2. Find the plant spacing you are going to use on the chart (Planting on Center) Take the corresponding number of plants per sq. foot and multiply that by the total sq. footage of the area you are planting to give you the number of plants you will need <u>For example:</u> Your planting area is 10 ft by 3 ft and you are going to use 6" spacing. Multiply 10 ft x 3 ft to get your total square footage (30 sq. feet). Look on the chart under Planting on Center to 6". Take the corresponding plants per square foot (4) and multiply that by your total planting area (30 sq. feet). The total number of 6" plants you will need (4 x 30) is 120.
